Career Objective

Frontend Software Engineer with hands-on experience building production-grade frontend systems for fintech and Web3 platforms, including customer, vendor, and admin panels using React, Next.js, and TypeScript. Skilled at translating complex requirements into scalable, maintainable UI architectures and collaborating closely with backend and design teams to ship reliable products. Looking to bring this expertise to a frontend engineering role where I can drive end-to-end feature ownership and contribute to high-impact, user-facing systems.

Experience

SoluLab – Frontend Trainee

February 2026 – Present

- Developed responsive user and admin panel interfaces for internal and client projects using React, Next.js, TypeScript, and Tailwind CSS.
- Built reusable UI components and pages for admin dashboards and user-facing panels, ensuring consistency across multiple client projects.
- Worked within cross-functional project teams of 5+ members, including Project Managers, Business Analysts, and designers, translating requirements and sprint plans into functional frontend deliverables.
- Received hands-on mentorship from senior frontend developers, adopting best practices in component architecture, code reviews, and scalable TypeScript-based development.
- Collaborated with backend and design teams to integrate APIs and implement UI as per design specifications.
- Worked across the frontend stack (React/Next.js) to deliver maintainable, type-safe code using TypeScript.

Projects

SPARK Social – Digital Token & Vendor Reconciliation Platform

2026

Tool: [React, Next.js, TypeScript, Tailwind CSS]

- Built the complete customer-facing frontend from scratch, including wallet dashboard, QR-based scan-to-pay flow, groups management, transaction history, and profile/settings screens.
- Developed the entire admin panel UI from scratch, covering role-based dashboards, vendor management, real-time transaction monitoring, reconciliation views, payout queue management, and audit log screens.
- Collaborated with backend and design teams to integrate REST APIs for wallet transactions, QR validation, and real-time vendor reconciliation data.

KindWallet – Multi-Platform Crypto Wallet Ecosystem

2026

Tool: [React, TypeScript, Tailwind CSS]

- Built the frontend for the Chrome extension wallet, including wallet setup (create/import), secure key handling UI, transaction signing screens, token management, and dApp connectivity flows using the Solana wallet standard.
- Developed the admin panel frontend, including user and activity management, swap/transaction monitoring views, referral system management, feature toggle controls, and platform analytics dashboards.
- Built the dApp Whitelist Management module UI within the admin panel, enabling review, approval, rejection, and flagging of user-submitted dApps with status indicators.

AI Resume Analyzer — React, Node.js, Gemini AI

2026

Tool: [React, Node.js, Express.js, MongoDB, Gemini AI, PDF.js]

- Developed a full-stack AI-powered application using React.js, Node.js, Express.js, and MongoDB to analyze resumes against job descriptions.
- Implemented PDF text extraction using PDF.js and data normalization for accurate content analysis.
- Integrated Google Gemini AI to generate ATS-style match percentages, missing skill analysis, and improvement suggestions.
- Improved resume evaluation and job-match readiness through automated, AI-driven insights.

Skills

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit

Backend: Node.js, FastAPI, REST APIs, Express.js

Databases: PostgreSQL, MongoDB, MySQL, SQL

Systems & Concurrency: Async Programming (asyncio), Multithreading, Multiprocessing, WebSockets, HTTP, Latency Optimization

Tools & Platforms: Git, GitHub, Docker, AWS (Basic)

Soft Skills: Problem Solving, Cross-functional Collaboration, Critical Thinking, Public Speaking

Education

Gyanmanjari Innovative University, Gujarat

Sep.2023 - June.2026

Bachelor of Technology in Information Technology

Gujarat Technological University, Gujarat

Aug.2020 - June.2023

Diploma in Information Technology

Achievements

-2nd Runner-Up at HackNUthon Hackathon 2025 (State Level)
