PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building production frontend systems for fintech and Web3 platforms, including customer, vendor and admin panels, using React, Next.js and TypeScript. Works closely with backend and design teams to ship reliable, maintainable, user-facing features.

EXPERIENCE

Frontend Developer (Trainee), SoluLab | Feb 2026 – Oct 2026
Tech Stack: React, Next.js, TypeScript, Tailwind CSS, REST APIs, Git

- Built responsive user and admin panel interfaces for internal and client projects, delivering 20 screens/modules across 3 projects.
- Created reusable UI components shared across 3 client projects, keeping design and behavior consistent and reducing duplicated code.
- Worked in cross-functional teams of 5+ with Project Managers, Business Analysts and designers, turning requirements and sprint plans into frontend deliverables in Agile sprints.
- Integrated REST APIs and implemented UI to design specifications with backend and design teams; applied component architecture, code review feedback and type-safe TypeScript practices under senior developer mentorship.

PROJECTS

SPARK Social: Digital Token and Vendor Reconciliation Platform | 2026
Tech Stack: React, Next.js, TypeScript, Tailwind CSS, REST APIs

- Built the complete customer-facing frontend from scratch: wallet dashboard, QR-based scan-to-pay flow, groups management, transaction history and profile/settings screens.
- Developed the full admin panel UI: role-based dashboards, vendor management, real-time transaction monitoring, reconciliation views, payout queue management and audit log screens.
- Integrated REST APIs for wallet transactions, QR validation and real-time vendor reconciliation data, working with backend and design teams.
- Implemented live transaction monitoring so the admin dashboard updates without a page refresh.

KindWallet: Multi-Platform Crypto Wallet Ecosystem | 2026
Tech Stack: React, TypeScript, Tailwind CSS, Solana Wallet Standard

- Built the Chrome extension wallet frontend: wallet setup (create/import), secure key handling UI, transaction signing screens, token management and dApp connectivity flows.
- Developed the admin panel frontend: user and activity management, swap/transaction monitoring, referral system management, feature toggles and platform analytics dashboards.
- Built the dApp Whitelist Management module, enabling review, approval, rejection and flagging of user-submitted dApps with status indicators.
- Built analytics dashboards with 3 charts/metrics for users, swaps and referrals.

AI Resume Analyzer | 2026
Tech Stack: React, Node.js, Express.js, MongoDB, Gemini AI, PDF.js

- Built a full-stack app that analyzes resumes against job descriptions, with PDF text extraction (PDF.js) and data normalization.
- Integrated Google Gemini AI to generate ATS-style match percentages, missing-skill analysis and improvement suggestions.

SKILLS

Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Responsive Design
Backend: Node.js, Express.js, REST APIs, WebSockets
Databases: MongoDB, PostgreSQL, MySQL, SQL
Concepts: Component Architecture, State Management, API Integration, Role-Based Dashboards, Agile/Scrum
Tools and Platforms: Git, GitHub, Docker, AWS (Basic)
Soft Skills: Problem Solving, Cross-functional Collaboration, Critical Thinking, Public Speaking

EDUCATION

Bachelor of Technology in Information Technology, Gyanmanjari Innovative University, Gujarat | Sep 2023 – Jun 2026
Diploma in Information Technology, Gujarat Technological University, Gujarat | Aug 2020 – Jun 2023

ACHIEVEMENTS

- 2nd Runner-Up, HackNUthon Hackathon 2025 (State Level)
